PANDUIT™

Network Infrastructure for the Data Centre

For most data centres, approximately 70% of the operating budget is spent on maintaining existing infrastructure while only 30% is for innovations aligned to your business goals. Your challenge is to reverse that allocation and transform your Data Centre into a strategic business asset.

Through our unique ability to leverage our technology partnerships and an integrated stack of physical and intelligent infrastructure solutions, Panduit delivers comprehensive data centre solutions.

Working with Panduit enables you to respond to strategic business challenges such as capacity management, migration from 10G to 40G/100G Ethernet, or other operational challenges to reduce operating costs and maximize capacity utilization for the greatest ROI.

This catalogue features the most common offering for a Data Centre Physical Infrastructure deployment. For the complete data centre offering, please contact your local Panduit representative or visit us at www.panduit.com.
